### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dawn Russel on 12/01/08.

The application has been amended as follows:

IN THE CLAIMS:

Cancel Claims 12 and 13.

1. Method of analysis of the tumor aggressivity of cancerous cells ~~consisting of~~ comprising the real time measurement of the quantity of polymerized actin in the steady state in a lysate of the said cells wherein the real time measurement of the quantity of actin in the steady state is carried out by static fluorescence polarization in the presence of actin monomers bound to a fluorochrome, the monomers being incorporated into the actin filaments (actin F) formed during the endogenous actin polymerization of the lysate.

6. Method according to claim 1, including the steps

of:

- lysing cancerous cells in non-denaturing conditions for the proteins, and the eliminating cellular debris,
- determining the total amount of proteins in the lysate,
- adding actin monomers bound to a fluorochrome,
- adding one or more substances to activate endogenous actin polymerization and protect the lysate proteins, wherein said substances are selected from the group consisting of ~~subunits of~~ the Arp2/3 complex and the EnaNASP family of proteins, and
- measuring the quantity of polymerized actin in the steady state in the lysate.

Claims 1-3 and 5-11 are allowed.

The following is an examiner's statement of reasons for allowance: The closest Prior Art of record, Tellam *et al.* teaches the measurement of the amount of polymerized actin by measuring the change in polarization of fluorochrome labeled actin monomers by spectroscopy. The reference does not teach or suggest the use of the static Fluorescence Polarization technique in measuring the polymerization of actin.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PAUL C. MARTIN whose telephone number is (571)272-3348. The examiner can normally be reached on M-F 8am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jon Weber can be reached on 571-272-0925. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
